

Summary of Fraser Sockeye Catch estimated in 2014 District 104 purse seine fisheries

Week	Total Sockeye	% Fraser	Fraser Sockeye
28	21,410	0.1%	15
29	31,860	0.0%	13
30	61,745	3.7%	2,254
31	137,734	15.6%	21,459
32	208,272	15.8%	32,969
33	110,433	41.1%	45,366
34	83,525	65.6%	54,826
35	47,502	58.1%	27,613
	702,481		184,515

Notes:

1. Source for table: Northern Boundary Technical Committee (January 2015).
2. My placeholder number of 500k was based on large Fraser run size and high diversion rate.
3. That number is obviated by these estimates: SNP DNA for statistical weeks 28-34; no DNA available for week 35, so estimate is based upon a reconstruction model.
4. DNA is being prepared so Fraser Panel sockeye method & baseline can be applied to identified Southern Migrants, will apportion ~185,000 Fraser sockeye to stock group.
